

“The International Society of Intraoperative Neurophysiology strongly condemns the terrible conflict over Ukraine territory, cause of suffering for civilians and innocent people.”

We are a non-profit international scientific society with members from Ukraine, Russia, and more than 60 countries worldwide.

The goal of our society is to educate to minimize human suffering from neurological sequelae after surgeries that threaten the nervous system. That is why we are desolated seeing the horrendous images and news from people suffering the consequences of a senseless war.

We support each one of our members during this challenging time, we are here to help, and we only hope peace will come soon to the land of Ukraine.

Humankind must take the path of respect and commitment with human rights and work to diminish the human suffering”.
