

## Karl Kothbauer Young Investigator Award

Given Dr. Kothbauer's dedication to scientific advancement as well as patient care the ISIN board of directors has voted to establish an award in his name. The International Society of Intraoperative Neurophysiology established the Karl Kothbauer young investigator award with the goal of stimulating research and publications by young investigators in the field of intraoperative neuromonitoring. The award is given to an IONM investigator at the beginning of their career who is under 40 years old and has a MD and/or PhD based on a submitted paper following the criteria below. The prize consist of 3 night's hotel accommodation as well as free registration to the educational meeting and the bi-annual symposia for the year of acceptance. The recipient is expected to present their paper at the next ISIN symposia.

The applicant will submit the paper to the ISIN by September 15<sup>th</sup> of the year the bi-annual symposium will be held. The paper will be reviewed as if it is begin submitted to Clinical Neurophysiology. If the paper is accepted, it will be published in Clinical Neurophysiology. Please submit your manuscript to: [info@neurophysiology.org](mailto:info@neurophysiology.org) .

### Criteria:

1. First or corresponding author
2. Novel methods or improvement in older methods
3. Study design
4. Study analysis
5. Clear presentation of results
6. How it benefits the field of IONM
