Welcome to ISIN 2026

Dear All,

On behalf of the International Society of Intraoperative Neurophysiology (ISIN) and the Society for Intraoperative Neurophysiology of India (SION), I am delighted to announce the **ISIN 2026 course and congress**, to be held in Mumbai between **2nd and 7th November 2026**. This landmark event will bring together leading experts, practitioners, and researchers in the field of Intraoperative Neuromonitoring (IONM) from across the globe.

For the **first time ever**, this prestigious global event comes to **India**, hosted in the vibrant metropolis of **Mumbai** - a city where tradition and innovation thrive side by side. Mumbai is a veritable melting pot of cultures, driven by its status as India's financial and entertainment capital, which attracts people from all over the country and the world. It is extremely well-connected globally and is the perfect base for exploring the vast and exciting country of India. Here, modernity blends seamlessly with tradition. Its diverse population contributes to the city's unique blend of traditions, a wide variety of cuisines ranging from traditional Indian street food to global flavors, combined with the comforts of a global Megapolis. The city's culture is also expressed in its art, music, architecture, and its ability to make people from many backgrounds feel at home. This essence of Mumbai is embodied in the theme of the meeting - ***Global IONM Expertise meets Indian Innovation***

The local committee is excited to welcome you and promises a scientific extravaganza and cultural feast.

Dr Aliasgar Moiyadi

Dear All

On the behalf of the International Society of Intraoperative Neurophysiology (ISIN), it is our great pleasure to invite you to attend the ISIN educational course and congress 2026 hosted in Mumbai.

Our objective is to pursue the international advancement of excellence in intra- and perioperative Neurophysiology, to advance standards of care for patients undergoing surgical procedures associated with risk of neurological injury.

The course and conference welcome beginners as well as advanced performers of Intraoperative Neurophysiology (IONM). As we are a truly interdisciplinary society, we are open to all specialties and backgrounds related to the field of IONM.

We are looking forward seeing you all in Mumbai for an interactive educational and scientific event!

Kathleen Seidel
ISIN President

Isabel Fernandez-Conejero
ISIN Educational
Committee Chair

Maria Tellez
ISIN Scientific
Committee chair

Why Attend

Global Leadership: Hear from world-renowned experts in IONM, neurophysiology, and surgery.

Scientific Excellence: Discover the latest advances in research, clinical practice, and neurotechnology.

Hands-On Learning: Engage in dedicated small group discussions, interactive workshops, and expert case sessions.

Networking Opportunities: Connect with peers, mentors, and innovators from around the world.

Cultural Immersion: Experience the sights, sounds, and spirit of Mumbai.

Save the Dates!

Mark your calendars for this exciting opportunity to learn, connect, and grow.

Details regarding venue, registration, and abstract submission will be announced soon.
